CCF SCAVENGER HUNT
FIND AN AED—SAVE A LIFE

Find your automatic external defibrillator (AED)

Make note of the location

Take a photo with the AED

Post to Instagram with #ProtectKidsHearts, name of camp, and location of the AED

FACTS TO KNOW

- Approximately 7,000 children, age 18 or younger, experience a cardiac arrest every year.*
- Cardiomyopathy is a leading cause of sudden cardiac arrest in children, especially among young athletes.*
- Two-thirds of sudden cardiac arrest deaths occur without warning or prior indications of heart disease.**
- Immediate CPR and early defibrillation with an AED can double a victim’s chance of survival.**
